How to change manager's speed, timer and cooldown timer.

We have 3 manager types here: Junior, Senior, Executive. To edit them, open Scripts/ ManagerSelection.cs script, find the method "createManager" and edit here:

```
164
165         if (managerType == ManagerType.Junior)
166         {
167             manager.speed = 2;
168             manager.timer = 60;
169             manager.cooldownTimer = 4 * 60;
170             manager.timerCountdown = manager.timer;
171             manager.timerCooldown  = manager.cooldownTimer;
172             manager.managerType = managerType;
173         }
174         else if (managerType == ManagerType.Senior)
175         {
176             manager.speed = 3;
177             manager.timer = 3 * 60;
178             manager.cooldownTimer = 7 * 60;
179             manager.timerCountdown = manager.timer;
180             manager.timerCooldown  = manager.cooldownTimer;
181             manager.managerType = managerType;
182         }
183         else if (managerType == ManagerType.Executive)
184         {
185             manager.speed = 5;
186             manager.timer = 5 * 60;
187             manager.cooldownTimer = 10 * 60;
188             manager.timerCountdown = manager.timer;
189             manager.timerCooldown  = manager.cooldownTimer;
190             manager.managerType = managerType;
191         }
192
```
